

INTEGRATED BIOMETRIC TURNSTILE

AURORA THE FACE OF BIOMETRICS

INTEGRATED FACIAL RECOGNITION AND FULL HEIGHT TURNSTILE FOR TIME AND ATTENDANCE WITH COMPLETE SITE SECURITY

FULLY SELF-CONTAINED BIOMETRIC ACCESS PORTAL

- **Leading edge**, non-contact Facial Recognition for quick and accurate verification
- Designed to be **re-deployable over multiple projects**
- **Eliminates** manned guarding requirement
- Delivers **maximum ROI** with easy to use **administration and audit** software
- Designed and Built in the **UK** with **local support**

The **IBT** combines Aurora's **ClockFace+** Facial Recognition system with a fully secure, weather resistant turnstile for the ultimate in managed access with highly accurate biometric Time and Attendance monitoring. Designed primarily for the construction industry, **IBT** is totally self-contained, easily re-deployable and extremely robust. Suitable for all types of site and size of workforce, the **ClockFace+** Facial recognition unit within **IBT** provides fast, reliable non-contact biometric recognition of users making it impossible to "buddy punch". The full height turnstile prevents access to any un-authorized persons and a panic button is provided in case of emergency.

Users can receive Health & Safety and other messages via the **ClockFace+** screen as they clock in and out, with administrators able to target messages to individuals or groups. **IBT** can also be used with a proximity card or separate PIN pad. Optional extras include roller shutters for additional protection and security and **IBT** comes mounted on a steel pallet for easy re-deployment. With a single power and network connection, **IBT** can be installed and commissioned in hours and the units have a lifespan of many years, often working on several sites so maximising the return on investment.

Order	Description	Day	Thumbnail
1	Admin	Fri 16/03/2018	
2	Authorised	Sat 17/03/2018

7	CheckClock	Thu 22/03/2018	
8	Change	Fri 23/03/2018	
9	Drop	Sat 24/03/2018	
10	Even	Sun 25/03/2018	

Available in single or double units depending on throughput requirements, **IBT** links to Auroras powerful Time & Attendance and Workforce Management software. Once enrolled, staff can be recognised at many different sites also using **IBT's** or Aurora's other products, such as **MobileClocking** or **TabletClocking**. **TimeKeeper** software allows administrators to generate reports, create and maintain an extensive database of employee details and audit compliance in key areas such as hours worked against statutory maximums. **TimeKeeper** can also link all **IBT** activity directly to payroll, driving administration costs down further by improving efficiency.
